Pilot Program Available For Next 3 Clients | 6-month Introductory Rate

THE PROBLEM

Many organizations do not need a **full-time** security director

However most need a solid security plan and guidance to create that plan.

No Security Plan

No documented threat profile, protocols, or emergency response plan.

You're Improvising

Social media, online chatter, and local patterns go unmonitored until it's too late.

No Response

When a situation escalates, there's no trained professional to call and no protocol.

Full-time CSO is Cost-Prohibitive

\$175K–\$250K+ salary. May be cost prohibitive for some firms, families, or high-profile individuals.

PROACTIVE THREAT INTELLIGENCE

We take the watch so you can carry on with business and life.

Social Media & Open-Source Monitoring

Continuous scanning for mentions, threats, and reputational risks. Every alert is reviewed by a human analyst before it reaches you no automated confusion.

Web & Media Surveillance

News monitoring, dark web indicators, and digital footprint tracking for your organization.

Geographic & Travel Intelligence

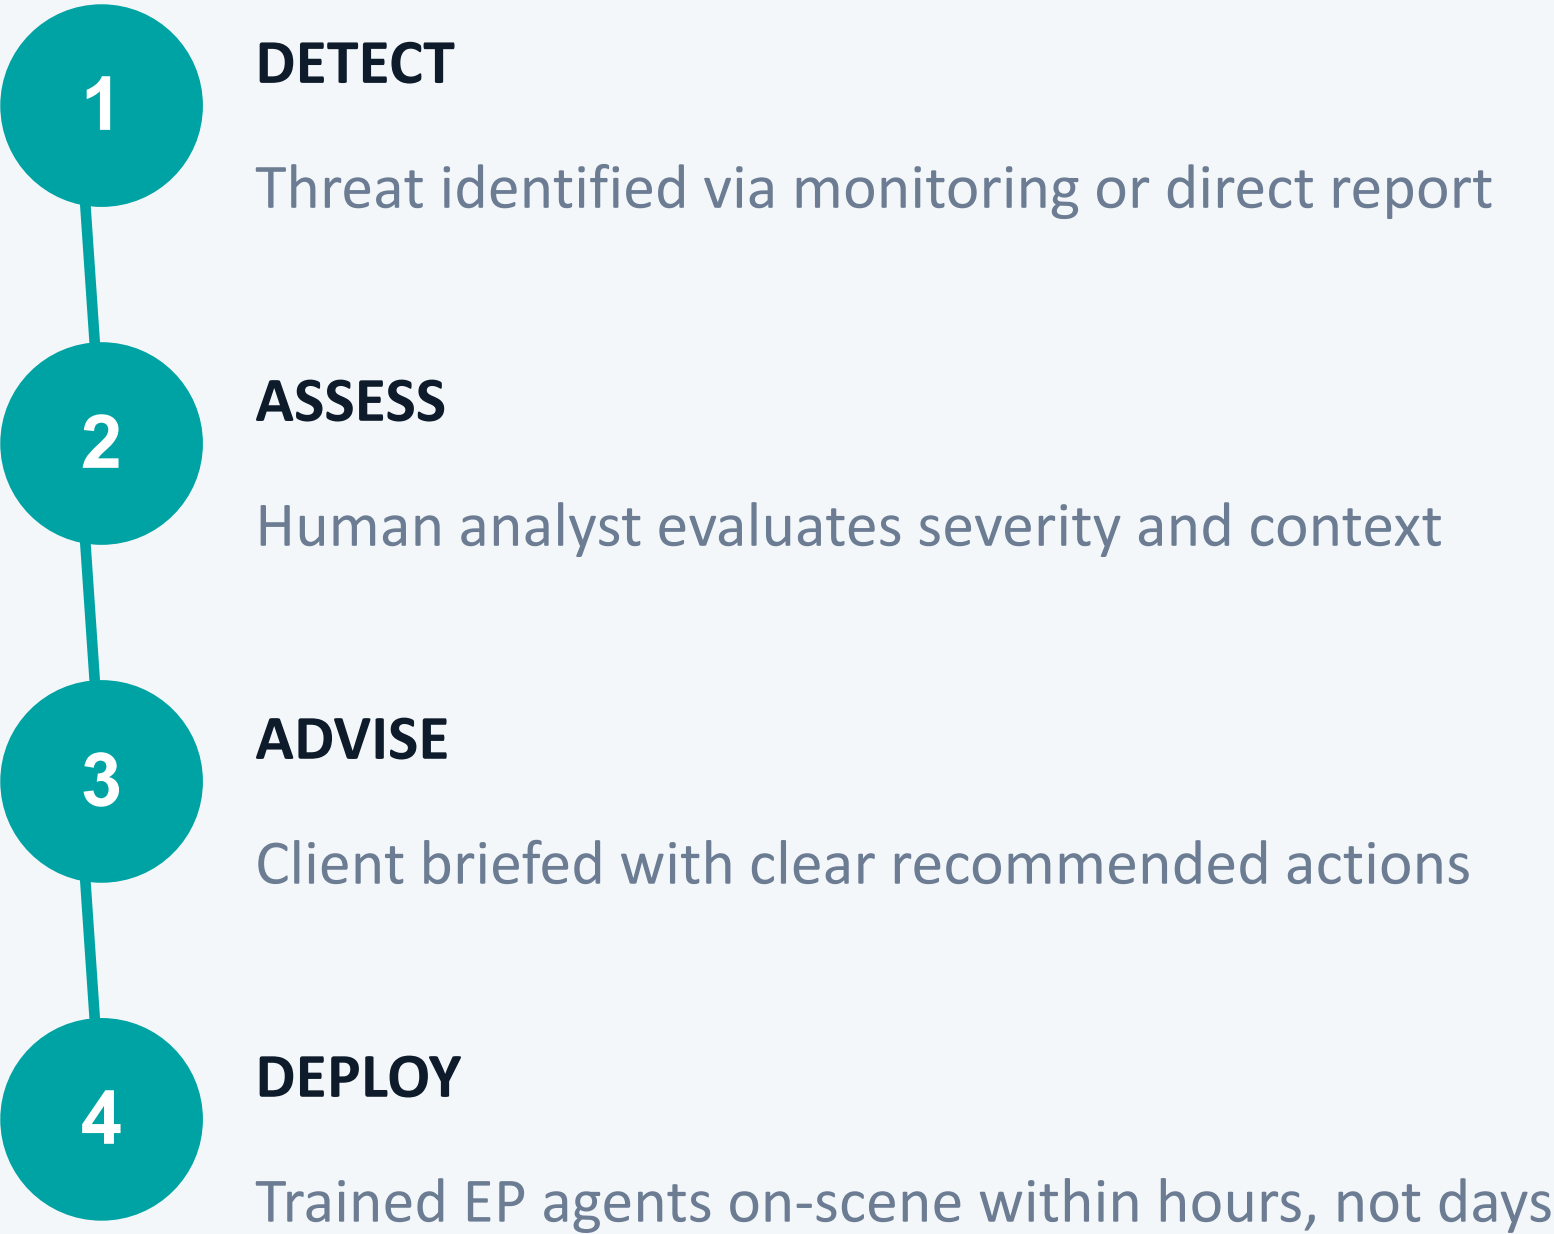

Local and regional threat patterns, travel condition briefings, and advisory when needed.

Human Assessment / Not Just Algorithms

Every piece of intelligence is reviewed by a trained analyst who understands context, motive, and what it means for your specific situation.

BUILT-IN CRISIS RESPONSE

Boots on the Ground — When It Matters Most

Response Tiers

Tier 1: The First 8 hours of crisis or threat response is covered. Executive Protection Level Agents deployed if needed.

Tier 2: Priority response included in your plan. The first 36 hours are covered for boots on the ground when activated.
